

# NYC Taxi Report 2024 - Yellow & Green

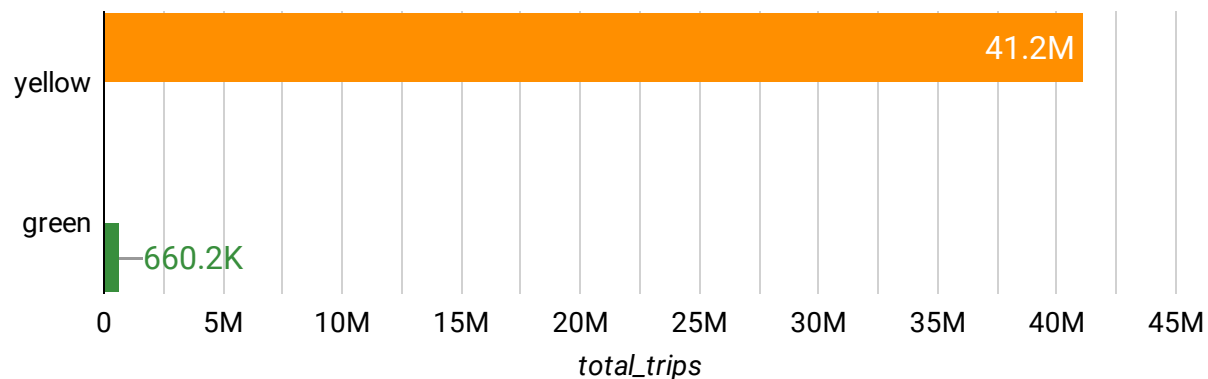

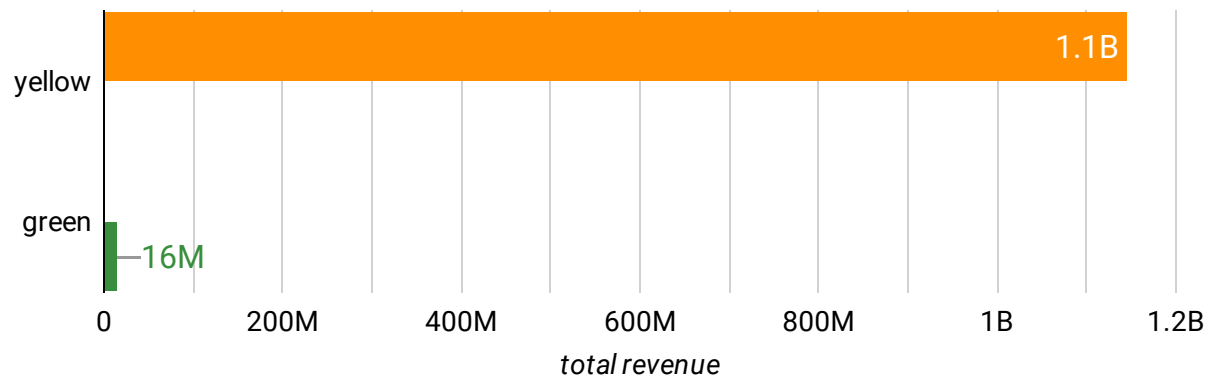

*summary for the year  
2024*

total trips  
41,829,938

total\_passengers  
55,779,708

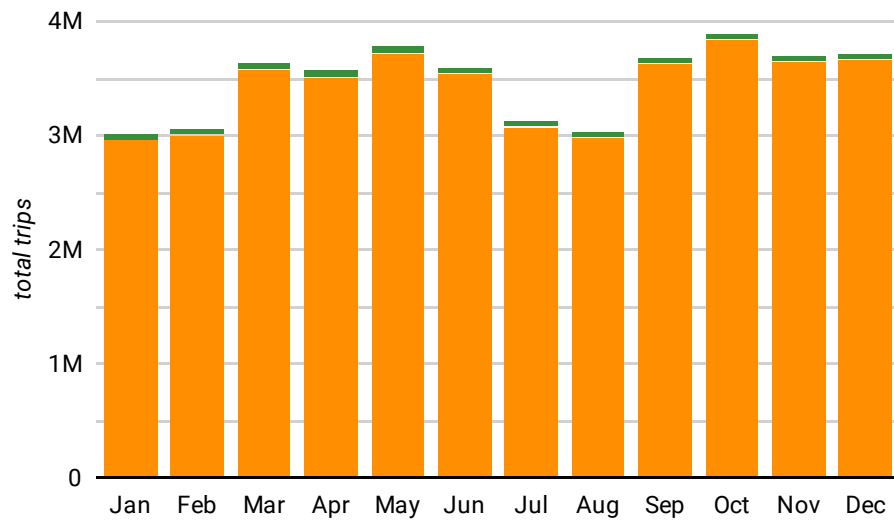

total revenue  
1.2B

most active month  
Oct

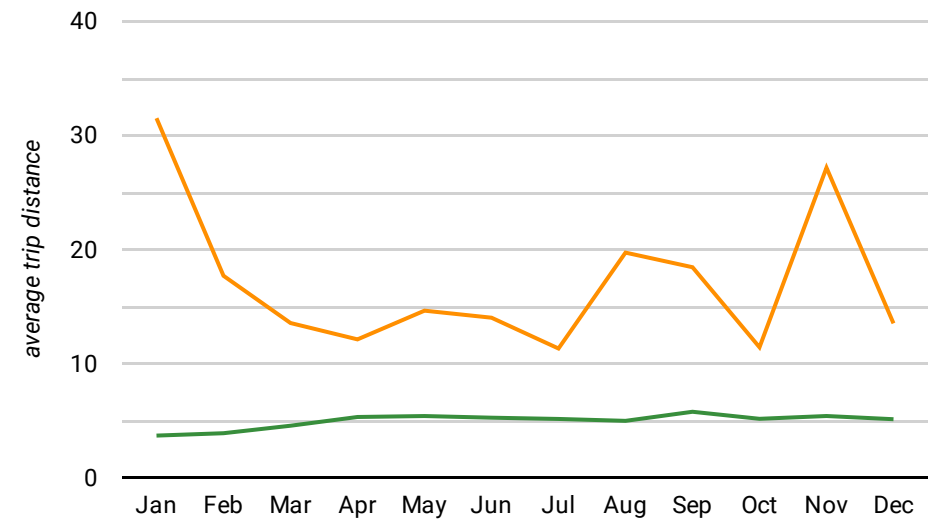

**Yellow taxis** dominate NYC taxi traffic in both **trip volume** and **total revenue**.

### Yellow taxis dominate in trip volume

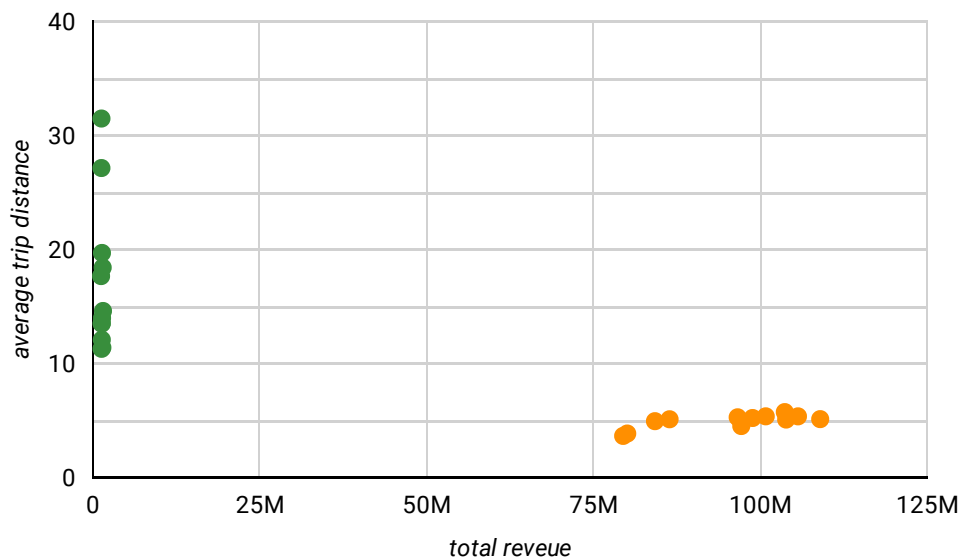

**Yellow taxis** consistently have more trips than **green taxis** every month. This are also seasonal fluctuations with dips in July/August and Jan/Feb, maybe weather, tourism, or holiday-related.

### Green taxis have much longer average trip distances

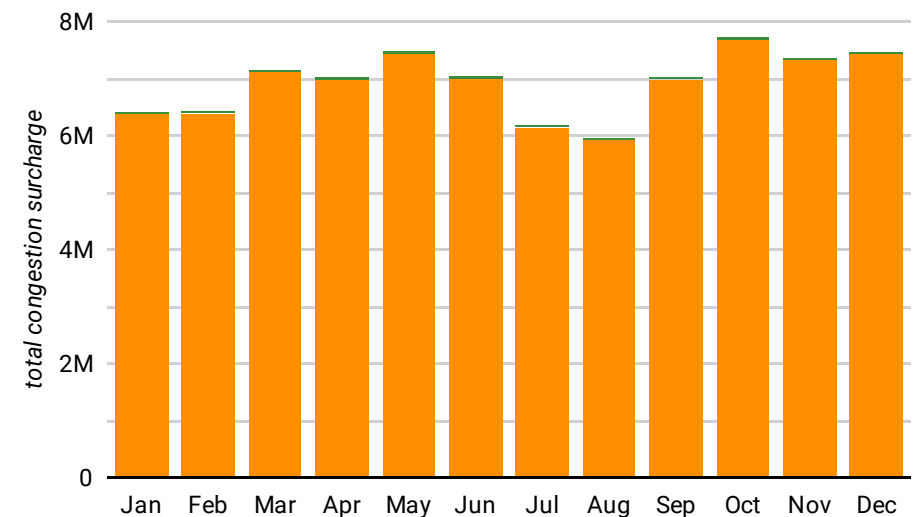

**Green taxis** tend to handle longer rides, likely from or to outer boroughs, whereas **yellow taxis** serve denser, inner-city traffic.

### More trips, shorter distance

**Yellow taxis** take more trips, but cover shorter distances. Yellow cabs are the mainstay of NYC's taxi fleet, while **green cabs** serve a smaller niche and longer trips, like outer boroughs or low-demand zones.

### Congestion surcharges are higher for yellow taxis

**Yellow taxis** likely serve routes with higher congestion and regulation-based fees, like Manhattan core, where these surcharges are applied
